

10,000+
SOLUTIONS
 for Pneumatic Applications

Alkon is unique in the fluid power industry – we provide quality products with innovative designs. Customers come to us because they know we'll do it right.

Doing Business with Alkon

- ◆ **We are a relationship-based supplier** – Large enough to handle just about anything you require and small enough to know you by first name.
- ◆ **Less is best** – Alkon designs are made with minimal parts – what you need, nothing more – and optimized for reliable operation and easy maintenance.
- ◆ **Can-do technologies** – Include “lights-out” production, 3-axis CNC lathes, 120-tool machining centers and SmartScope MVP optical video probe for testing. When existing machines can't provide the efficiencies we want, we build one that can.
- ◆ **Pre-applied thread seal** – On male threads push-to-connect.

Fittings

Alkon push-in fittings provide 60% more flow than conventional fittings with internal tube supports and save up to 75% in assembly time. We welcome custom parts orders on short notice.

- ◆ **Configurations/functions** – Shaped or straight, swivel or stationary industrial fittings (push-to-connect [PTC], brass pipe, compression-type), manifolds and specialty fittings (MQ manifolds, MTQ connectors and design-your-own). Brass with nickel plating for durability in harsh conditions.

We're one of the largest U.S. manufacturers of brass push-to-connect (PTC) fittings.

Fittings, Valves, Flow Controls & Industrial Tubing

Valves

Alkon valves are some of the fastest cycling and most reliable in the industry, with hundreds of options.

- ◆ **Made to order** – Every valve is made to order with **ONLY** the options you need.
- ◆ **100% tested** – Every unit tested for precision operation before shipping.
- ◆ **Configurations/functions** – Directional Control Air Valves, Lockout Valves, 3-way and 4-way Valves, No-lube Valves, Lapped Spool Valves, SPRITE Valves, Stand-alone Valves, Manifolds and Stacks. Standard or high-temperature sealant.

Alkon is one of only a handful of companies worldwide with the technology to produce Lapped Spool Valves.

Flow Controls

Alkon's angle and in-line flow control products, including needle valves, are known for high-flow, ultra-reliable performance.

Industrial Tubing & Accessories

Alkon has the right tubing for your application – polyethylene, polyurethane and nylon – and everything you need to work with it, including cutters, racks, color-coded caps and handy emergency repair kits.

Contact Alkon Today. Call **419.333.7000** or email **sales@alkoncorp.com** for more information. We can help you save money, get more profitable and grow your business.

Keeping the world moving and working.
